Ravimoova website improvements 20241010

1 Ribbon: Tax Laws

This function vital to our website because it carries references to all tax laws – principal legislations, regulations, practice notes and other general notices.

1.1 The ways laws are written

Laws written by using tables and the after completion the rows and columns of the tables are made faint or invisible at all. When it comes to linking sections and subsections, we only need to link relevant sections or subsections.

1.2 The way we want a tax appear

We only need to have a reading panel or the whole screen view that enables the user to read comfortably. In case read only tax laws, the same laws should be structured in such way that links can be operated effectively and efficiently.

1.3 Linking tax laws

We propose that any tax was should be linked by using links provided in the same tax law or regulation alone. We don't propose creation of links between the document and any link available in another document. This would be tedious and meaningless. We propose that links that may be made should only be those within a specific tax law or regulation alone.

We propose internal links be sections or subsections only

1.4 Navigating between links and returning to a previous link

We propose that back reference be maintained between previous 5 links alone.

2   Tax laws formats

Tax laws with no amendments insertions by the administrator should be in PDF formats and downloadable.

Tax laws with amendments by the administrator should have a different described hereunder and are read only, may not be copied or downloaded. Tax laws with amendments by the administrator should be read only with option to copying and printing.

2.1 Uploading a tax law or its amendments

We propose that administrator be the one to upload and down tax laws or regulations

3   Publication

Perhaps we made mistake by prescribing the Finance Acts as Publications. The Finance Acts are basically tax laws. We therefore opine that Publications be only papers or excerpts of any documents by various authors.

3.1 Our proposed appearance of Publication menu

The publication menu should contain the following fields –
   a) Name of the Publication
   b) Author
   c) Publisher
   d) Date of Publication

3.2 Uploading publications

We propose that administrator be the one to upload and down tax laws or regulations.

3.3 Publications Formats

All publications should be PDF files and may be downloaded.
